

INVENTION OF PLANETARY MEDICINE

„ We are the first civilization that feels Climate changes and the only people that can do something to balance Planet " (The message of US President Barak Obama -știri every RTV Romania-08.30.2015).

„ I civilization today you have done Planet waters are black, there are blue " (Message natives representatives from the US to the world's governments - Book, foray into the underground world of Gen. Emil STRENGER 2014).

, Was something wrong with Terra animals can not flee as before and diseases are unknown and unfamiliar to them " - Researcher of Yellowstone Park Animal Planet TV-US-2015.

Yes, that is right, 1 l of water from the Danube river -Romania had a brown aura with a diameter of 10 cm in 2017, in 2000 it had a blue aura with a diameter of 80 cm/1 l of water. In 1980 it had a blue aura- indigo with a diameter of 4 m/1 l of water, in 1900 it had indigo aura with a diameter of 6 m/1 l of water. All natives are capable to see the aura and were mastering this knowledge for thousands of years. They all have a blue aura with diameter of 4-7 m and have preserved it in all the areas, where it is still vital for the planet -Amazon, Easter Island, Australia, Borneo.

An average modern man in the northern hemisphere has a red aura with a diameter of 30-50 cm, those in the southern hemisphere stand slightly better, for example, New Zealand-Australia-locals have a yellow-green aura with the diameter of 2 -3 m.

The northern hemisphere is much more polluted than the southern hemisphere, which has led to a decrease in IQ energy at the planetary level - in human bodies, fauna, food, etc.

So, in the northern hemisphere, the IQ energy is at the level of 50% being under great influence of everything in the environment. The population in its majority has IQ 50% and four layers of the aura (excluding the great initiates and spiritual gurus).

In 1900 mankind had 27 layers of aura according to those 27 Multilevel Existences; after the great surface and underground nuclear experiments in 1950-1963, the number of aura layers decreased to 12-14, after Chernobyl in 28.04.1986, the number of aura layers decreased to 7. After Fukushima, the aura layers decreased to 4.

In the southern hemisphere, the population's IQ is 80-85%, and people have between 7-12 layers of the aura.

The degree of electromagnetic, nuclear, fossil fuel combustion in the northern hemisphere is up to 80-85%, in the southern hemisphere 20-30%, which is confirmed by the many malformations observed in polar bears. A recent TV show on Animal Planet channel called North Pole revealed that polar bears still have 3-4 layers of aura compared to 27 in 1940-1950. Antarctic penguins

have ten layers of yellow-green aura-aura with a diameter of 2-3 m, QI -85%; polar bears have only IQ -10-15%, dark red aura with the diameter of 40-50 cm aura diameter.

More and more cases of deaths of newborns are occurring in with people all around the world. The explanation is that a newborn baby has IQ energy between 3-30%, and so do most parents. The aura is dark red - red with a diameter of 20-30 cm, compared to the indices of 1990-a newborn baby had a blue/indigo-blue aura of 2-5m in diameter.

Something happened to the planet within its quantum spectrum.

The current protection technologies in the case of nuclear reactors, radioactive waste containers, electricity transmission lines, electric transport, on-board computers in machinery, aircraft, emission stations, exhaust filters, etc., are insufficient and inefficient.

The disaster is happening on another level than what has been known before. Here are some examples:

-Case study: electrical information the reached out to the electric radiator or resound is only 3% when 97% of harmonics are not used. They are harmful and form a field of about 4 meters.

-case study: radiator 2 KW, with about 80-90 ranges of harmonics, including positive ions that slow down the process of formation of negative ions, are beneficial for the QI energy in the location (office, dwelling, etc.). Some of the present sizes can be measured with electro smog Meter, EMF, Strength Meter, Peres Vol, or Radionic. By applying a magneto-quantum octogram to the power cord, multiple sockets, or safety panel of the apartment, office.

-Electro smog decreases by 80-90%, reaching only 1-2% compared to the original 15-80%. If TV is working in the office/in a dwelling, in an hour QI in the dwelling goes down at the level of 60%, in 3 hours -30%, after 6 hours -10% compared to the initial QI of 100%. Initial QI in the dwellings in the northern hemisphere is between 20-50%. An octogram on the TV's power cord or its stand keeps the QI energy at 100% around the TV or computer (add 1-2).

The initial energy of the food in refrigerators, storefronts, and food storage refrigeration rooms is 32%.

—case study: milk, eggs, meat, vegetables - decreased by 80-90% in the first 10 minutes, due to the energy field of the freon, the polystyrene insulation, the steel sheet that disturbs some of the IQ particles in the cosmic energy that feed everything on Earth. Energetically dead food cannot feed a human body's cells, a large percentage of our diseases are caused by the food kept in the refrigerator. People will not give up on it, that is why in this way we researched the effect of quantum octogram, from the formula of the quantum amplifier and the results are 100% beneficial. The energy of the food becomes 100% even if initially it was 50-60%, the shelf life gets longer and the smell of freshness is preserved.

Around a spray tube —example deodorant, within a radius of 2 m, there is no energy, the energy field of the freon having a gray aura, and the environment is red. There is no superior source of lifting vibration but applying a module of 1 cm square amplifier quantum, the Qi energy of the spray tube increases to 100% within the radius of 2 m, no longer affecting the surrounding space.

At the offices and housing climate installations cold air comes without energy, by application of quantum mode on the climate installation, the Qi energy in the initial dwelling is 50%, after one hour of operating in the dwelling the Qi is 80/90% compared to the initial 50%.

This also applies to the climate in vehicles, submarines, planes, shuttles, etc., with consequences for the decrease in the energy of the aircrew and passenger by 30/60%. The quantum module removes this impediment.

-case-study on optimally functioning nuclear reactors: according to current science, they emit harmful harmonics up to 30 km, the Geiger meter measures only 2% of the spectrum emitted by a reactor; 98% of the harmonics in more than 500 ranges that are not yet taken into account, but which are quite harmful since the population in the area or the service personnel have Qi of 30-40% compared to those outside this area, who have an orange aura with a diameter about 80 cm and Qi 50. Those in the nearby area within 30 km have Qi 25-30%, red aura, diameter 30 cm. Current materials used for insulation of reactors and waste containers

radioactive, emit radiation up to 1 km, and water currents carry the information way further. Water is extremely receptive, as per the Studies of Emoto M, which still are not sufficient. We must resort to another science, to another physics-quantum physics, even though the knowledge is flowing too slowly towards today's human minds, compared to the galloping destruction and overtaking pollution. I have a solution that reduces by 90-95% these sources of harmonic radiation of radioactivity-is the Quantic protecting insulation, Davidini type. It is a quantum film of 0.5 mm that has to be applied to a container of radioactive waste. It reduces the hazardous field to less than 1 m (from 1 km initially), and radiation gets reduced by 95%. In the case of nuclear reactors, such as Chernobyl and Fukushima, by applying the quantum protector, the harmfulness could have to get reduced from 40-50% as it is now to less than 10%. The aura of personnel in that area would have become 100% normal. Outside the radioactive source area, Qi is 50, orange color, diameter 80 cm respectfully.

The quantum protector operations mechanism

It is known that the radioactive source emits gamma radiation and hundreds of other ranges; these are subatomic particles and form a quantum micro universe and have gray color. The quantum protector has the purple aura and encompasses the entire spectrum of colors in the rainbow-light spectrum; for each color range in the light spectrum we found the physical particle of resonance and amplification of the subatomic particles that make up the light-red spectra , yellow, green, blue, indigo, violet- leptons, mesons, orgons, cryptos, informons, etc.

-Quantum protector being a high resonance quantum micro universe which determines the process of attraction of the Qi energy with which Earth is powered, and its energy is extremely intelligent and alive, seeking for harmony.

Earth is powered by 1 billion particles from 1000 frequency ranges/1 m²/1 minute. The supply is not uniform, depending on the energy harmony of the soil from the location; but until the first 1900-1920-electromagnetic pollution due to burning fossil fuels, Earth used to receive between 3-4 billion of positive IQ particles /1 m²/1 minute.

During the period from 1900 to 2015 electromagnetic pollution on Earth has increased by 400 billion times. Even bunkers are not sufficiently protected as the low IQ energy was registered inside of them as well. The cumulative energy pollution and other forms of contamination can be cured and harmonized utilizing a quantum amplifier.

The quantum protector through the formula and optimal resonance concentrations of the ingredients ensures this harmony, so we have two quantum micro universes – the gray one of the radioactive source and the purple one of the quantum protector. As it was tested before, in about 15-30 seconds they merge by obtaining an average of the vibration and green-blue color, the ash receives 2-3 layers of the light spectrum and the violet succumbs to the gray 2-3 layers of the light-spectrum in the new quantum micro-universe. The result- no more harm and Primordial QI energy from our Galaxy powers up the location up to 4-6 m around. (Book Tao Healing Light pp.214) the Earth loses its recharging capacity of QI energy If harmony gets disturbed in different locations.

The planet is alive, and as any alive organism, it has Chakras- the Gates of Light. Its suffering is exceeding 95%. A case of a clear eloquence has been shown on TV Romania channel: there was a perfectly healthy man of 94 who worked as a miner in a uranium mine for 25 years. All his colleagues died long ago plus That man was still living in that area with high radioactivity inclusively water bodies, that were contaminated too above acceptable values.

I was curious to see what was could be the reason, so I measured it radionically and got the following rates: that man possessed yellow aura, diameter 3 m, QI-80%, 100% spirituality level of his ancestors line. For comparison his colleagues had red aura of 25 cm-30 cm in diameter, QI-25%. The high vibrational level of man protects him from radioactive, electromagnetic, and other types of pollution.

Davidoni quantum magnetic octogram has the ability to ensure the aura of man from blue to purple, providing almost 100% protection for people working at electrical stations, electric transport, aviation, shuttles, laboratories with nuclear sources, etc., attached to work equipment (add 3-4).

Example of effects on humans in different situations of work and transport.

Men energy	Initial	In 1	In 4 hours	With a quantum
------------	---------	------	------------	----------------

	energy	hour		octogram
Automobile	100%	60%	20%	100%
Planes	100%	40%	15%	100%
Train, tram, subway	100%	35%	10%	80%- with 1 octogram 100%-with 2 octograms
Armored	100%	35%	10%	100%
Nuclear C.E.	100%	-30%	-10%	100%
Electric car	100%	25%	5%	100%

Currently, QI in the northern hemisphere is 50% and I worked a lot to increase it to 100%. I firmly suggest that the electric car should be equipped with a quantum amplifier from the start of assembling.

One of the scopes to create quantum amplifier was to reduce smoke and fumes from boiler baskets and vehicle exhausts (5-6), and it has shown good effects, but even better effects have been observed when the quantum amplifier was mounted directly onto machines.

It formed a plasma body around vehicles of 1-2 meters that caused a reduction of friction with air by 80%, increased the driver's beneficial vibrational level from 4 layers to 12 layers of the aura, removes fatigue. In some cases, it achieved 27 layers depending on the energy of the area where it circulated.

It oscillates on Earth from 0 to 900 MHz, depending on the minerals in the basement and other known radionic ifs (which represents 0-900 MHz-the higher the frequency the higher the energy).

In natural balneological resorts and medieval castles, we found the energy of 560-900 MHz (purple prana). Those who established constructions in such locations applied to the help of visionaries, generally in villages. Cities have 100-250 MHz, in areas with 20-30 MHz cases of cancer are more evident. In areas with 1-2 MHz, usually between localities, there are unexplained phenomena registered -one can hear screams, bangs, noises from other Multilevel dimensions; that was confirmed both by the elderly locals and by visionaries of nowadays. Such cases are known in several areas of Earth and were shown on TV, I studied such a case personally in the proximity area).

the negative energy Also disappears in the exhaust; the aura from gray ascends to indigo-violet, the harmful positive ions decrease from 270-330 initially to 190-200 positive ions/cm³ in gases from the exhaust.

If you put a module on the vehicle battery with the engine turned off- when the headlights turn on- it goes no more than 12 V(compared to 10-11 V initially) proving that it prolongs battery life. It also neutralizes by 90% the effect of the on-board computer on the driver and the harmful

effect of the climate in the car that takes the energy field from the freon and decreases the driver's QI energy more drastic than on-board computer.

The quantum amplifier neutralizes by more than 90% of these harmful effects. Indirectly there have also been registered reductions in fuel consumption, results could vary depending on the aura and driver's energy potential and the energy of the area where he travels.

The initial aim though is the decrease in environmental pollution and the health of the driver that is provided by the quantum amplifier- 1 set of 4 modules is applied at 100 hp-76 KW.

It can be applied wherever fuel is used-boilers, furnaces, machines, armored, ships for detoxifying effect, smoke reduction. It provides 100% protection to the human organism from psychotronic attacks and electrosmog.

Water bodies all over the world are out of power because of pollution. In our own research by discovering quantum water from rare, natural springs and obtaining quantum water through quantum octogram stimulation, we found a resolution.

Until Masaro Emato's published his studies, only 2% of water qualities were discovered; with his studies and results, it reached 3% (according to Emato's textbooks).

Water stimulated with quantum octogram increases its energy dozen times fold in about 15-30 seconds by increasing the size of the aura, changing the color into violet-purple- and increasing the number of quantum units from a few hundred quantum units/1 l water to 1 billion quantum units/1 l water with curative and regenerative effects on human cells. from 50-80%-case liver, kidney, brain, etc. (add. 8-9).

Water has a unique capacity to respond on quantum stimulation - if you put in the spring quantum foil in 15 seconds all the riverbed will be in the quantum field. Water all over hundreds of km collects cosmic QI being initially harmonized from the spring.

We have observed a similar effect on two rivers with natural quantum water, compared and measured QI. With good ecology and high energetic potential, any river can have been stimulated with natural elements of harmonization. The Quantum amplifier has all these elements to revive the waters.

Forests don't produce oxygen at the temperature over **350 C** . an energy collapse at + 35 o C occurs,

almost 90% of the size of the aura and its energy disappears.

In case with a cherry tree I measured it at + 35o C. It had 7 cm aura compared to 60 cm as it was supposed to be in spring. We put strips of quantum amplifier, at other trees we put magnetic fertilizer, within seconds the cherry aura increased to a radius of 2 m, and energy grew too. (from 2% because of the high-temperature collapse to 100%) and the energy also kept at + 45o C with active photosynthesis.

Magnetic fertilizer is a

granulated composite material for soil treatment or granulated quantum enhancer for agriculture. It was exactly that invention agriculture was waiting for 2000 years.

Advantages and application :

- reduces radioactivity around plants by 40-50%;
- comforts plants, relaxes vegetation;
- increase the concentration of autocyanates and terpenes in fruit that provide smell and vitamins;
- increases the concentration of minerals;
- increases yield production in wheat, maize, alfalfa, vegetable field by 30-100% including the improvement of quality characteristics;
- increases the concentration of sugars by 25-30% in fruit;
- keeps the cattle and sheep feed fresh all the winter through. Case study: outdoors, 100 g of granules was placed on the concrete postage with 200 tones of feed
- cures and helps animals to recover faster. Case study: in stable with 200 sick sheep we put on the ground 100 g of magnetic fertilizer; they got better in three days, the color of aura has chaned to indigo aura with diameter 2-3 m;
- increases meat and milk production at 10-20%, both cattle and sheep are in better condition. Case study: I put about 1 tablespoon of granules (approx. 20 g), and 3 quantum octograms on the water pipe from the well.
- reduces pests attacks in the field

- retains its moisture in soil during the irrigation. Case study: the batch with quantum granules kept soil moist for 3-4 days compared to the control groups that kept it humid for 3-4 hours,. Quantum granules restructure the soil and water in the soil; raising the color of the aura/1 kg of soil and its QI energy;
- enhances photosynthesis in trees at temperatures above 35o C up to 40-45o C. It is known that trees at the temperature 35C no longer produce oxygen, QI collapses.

Other effects in add. 10, 11, 12.

8% of the Earth's soil is aluminum. At one hectare of land, at the depth of a furrow of 30-40 cm, of a volume of about 2000 tons of untended earth/1 ha aluminum content is about 150 tons. At the administration of 7-10 kg magnetic fertilizer per 1 ha, in 7-10 years aluminum content that does not dissolve in the soil in the next 10 years is 140 -200 g, The role of aluminum in the granules of the resonance amplifier is particularly quartz (140- 200 g / 1 hectare).

This invention laid the foundation of quantum agriculture and can also be used to prevent desertification, to increase the threshold of photosynthesis, and reduce radioactivity in the forestry.

Behind the realization of these inventions, studies and researches in the frontier field of planetary necessity, stand 50 years since the first initiation in Martial Arts with annual seminars in initiatory sciences with great masters; over 1000 inventive projects and sketches, of which 360 executed practically. 25 years after the first invention of Antistress shoes with the quantum field, we researched and perfected quantum compositions for human use and planetary medicine.

Due to global pollution, we are in a pressing necessity for that unique composition. Even in the next 50 years, it will not be exceeded in its efficiency (assertion made by Gen Emil Strainu, an expert in psychotronic and other experts in the field of info-energy). If the right measures are taken in 5-10 years our planet would be in harmony and 100% healthy.

Inventor Ion Davidoni, Romania
